PROJECTS

YensoGram-v2.0

<https://github.com/Onyenso/YensoGram-v2.0>

Used Python (Django), JavaScript, HTML and CSS to create a web application that allows a user to upload media, text posts to a real-time feed and send instant messages in form of chats to other users.

- Video of this project's demonstration is @ <https://youtu.be/BitGvADB9cs>

Mail

<https://github.com/Onyenso/mail>

Used Python (Django), HTML, JavaScript, CSS and AJAX methods to create a single-page email client that sends and receives emails using API calls.

- Video of this project's demonstration is @ <https://youtu.be/6DKoBh-TEVE>

Auction

<https://github.com/Onyenso/auction>

An e-commerce auction site that allow users to list items for auction and allow other users to bid on the item. Developed using Python (Django), HTML, CSS.

- Video of project's demonstration is @ <https://youtu.be/MJZTLgJltCo>

PROFESSIONAL DEVELOPMENT

Computer Science for Web Programming

Harvard University

Intermediate C++

Microsoft

Introduction to C++

Microsoft
